Lessons learned -  
Leveraging  
Connected health  
solutions for  
Covid-19 and  
beyond

## How do we help seniors stay in their homes?

While helping them manage any chronic issues  
as they age.

# Transitioning healthcare

## The COVID-19 pandemic accelerates healthcare transformation

Risk-averse culture, legacy systems, regulation and compliance challenges are hindering the uptake of emerging technologies in healthcare services, COVID-19 has been a trigger that has led to an accelerated digitalisation

## Inclusive, person-centred connected healthcare

By extending healthcare beyond the walls of a facility, healthcare organisations can leverage remote care applications, connected and non-connected devices, two-way video and survey questions to be able to remotely triage patients based on greatest, immediate need while maintaining quality of care.

## Too fast too soon?

Barriers safeguards of quality standards and patient safety benchmarks. Immature product launchings. Product development without system implementation evaluations.. How do we make the development stick?
