

Northern Periphery and  
Arctic Programme

2014–2020

**Priority 2:**  
Strengthening the capacity for climate  
change adaptation, and resource  
sufficiency in NPA communities

2.1 promoting **energy efficiency**  
measures

2.2 promoting **climate change  
adaptation**, risk prevention and disaster  
resilience

2.3 promoting the transition to a  
**circular economy**

## PO 2 A greener, low-carbon Europe

# ”Strengthening the capacity for climate change adaptation, and resource sufficiency in NPA communities”

| Specific Objective                      | Updated actions                                                                                                                                   |
|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| a) Promoting energy efficiency measures | Transfer and sustainable development of energy efficiency and smart energy management concepts, suitable for cold climates and remote communities |
|                                         | Facilitating the use of place-based energy surpluses in remote communities                                                                        |
