

APP4SEA

ARCTIC PREPAREDNESS PLATFORM FOR OIL SPILL AND OTHER ENVIRONMENTAL ACCIDENTS

APP4SEA will improve oil spill preparedness in the NPA region and contribute to the environmental protection of Arctic seas.

APP4SEA INTERMEDIATE RESULTS

The main goal of the project is pooling competences in oil spill response (OSR) and search and rescue (SAR) in Arctic conditions. Key deliverables:

- Review of OSR best practice technologies in Arctic seas
- Joint database on oil weathering
- Shared oil spill drift models

APP4SEA FINAL OUTCOME

The project will produce an open access smart map showing shipping routes, OSR and SAR infra, weather zones and nature protection areas. This tool can be used to:

- Highlight gaps in the OSR infra
- Recommend OSR solutions in case of accident
- Facilitate the protection of marine bird species and the livelihood of coastal communities
